EDUCATION

- My certificates from Testing Automation University:
  https://testautomationu.applitools.com/certificate/?id=9b442060
- Computer Science – UNISEB (Faculdades COC), finished in 2014.

WORKING EXPERIENCE

- **BairesDev - (QA Engineer) - from August 2021 until September 2022.**
  Working at Brief Your Market as a BairesDev contractor.
  • Doing manual and regression tests in our front-end application.
  • Using Azure DevOps, Kanban and Scrum.

- **GFT - BNY Mellon (QA Engineer) - from May 2021 until July 2021.**
  Worked at BNY Mellon as a GFT employee.
  • Developed the automated tests for the client desktop applications.
  • Used Specflow to write the scenarios with gherkin syntax.
  • Coded in C# and Ranorex.
  • Used Jira, Kanban and Scrum.

  Competences: C# · Git

- **Moip - PagSeguro (QA Engineer) - from Aug 2020 until May 2021.**
  PagSeguro acquired Wirecard's operation in Brazil.
  • Working at the mobile interface team, testing the Android and iOS version of our app.
  • Developed the mobile automated tests using java and Appium.
  • Worked with agile methodologies using scrum and Kanban alongside with the following ceremonies, planning, daily and retro.
  • Also used JIRA and Kibana to document the bugs found.
  • Confluence to document the projects and tools used.

  Competences: Swagger API · GitLab · java · Appium · Android · PostgreSQL · Postman · Git

- **Wirecard Brasil(QA Engineer) - from Feb 2020 to Aug 2020.**
  Worked with a global team alongside with Germany testing our app that show the clients their merchant transactions.
  • Used Postman and Rest-Assured for manual and automated tests.
  • Automated mobile testes for iOS using Appium.
  • Wrote E2E tests cases and mapped scenarios using JIRA's Confluence.

  Competences: Swagger API · GitLab · java · Appium · Android · PostgreSQL · Postman · Git

- **Beblue (QA Analyst) - from January 2019 to January 2020.**
  Cashback fintech.
  • Tested virtual credit account for the clients to use it at our partners.
  • Wrote Gherkin scenarios of the PO's (Product Owner) stories at JIRA.
  • The tests were made at several systems such as our frontend website and our Backoffice.
  • Tested the POS (Point Of Sales) used to test card payments.
  • Backend tests with postman.
  • Manual mobile tests on Android and IOS versions of the app.
  • Mobile A/B tests with Analytics.
  • Automated tests were made for the mobile version using java and Appium.
  • Stress tests were made using locust and python.
  • The squad worked with the scrum master using agile scrum and the Kanban board at JIRA.

  Competences: Swagger API · java · Appium · Android · PostgreSQL · Postman · Git

- **Bluestorm (Java-Spring Developer) - from April 2017 to January 2019.**
  Worked as back-end developer for a USA client called CitizensRx (a fullservice pharmacy benefit provider for companies and health plans).
  • Implemented backend (microservices) automated tests using Rest-Assured and Junit.
  • Implemented invoice system integration using SoapUI and xml.
  • Used TDD (Test Driven Development) and Postman to test the APIs.
  • The microservices were placed inside AWS cloud services, we used ECS and
  EC2 with docker containers to run our applications made with:
  • Java Web (JDBC, Hibernate, JPA), Spring Boot and NodeJs. Used Oracle Database.
  • S3 was used to store the images(bin/jar) created by the applications.
  • The deploy system works based on CD (Continous Delivery).
  • Jenkins made AWS Lambda calls coded in python, also used API Gateway so jenkins could call the lambda functions.
  • The code was placed in AWS CodeCommit using GIT.
  • OS used was Ubuntu.

  Competences: Swagger API · SoapUI · java · Lambda · Postman · Git
